Summary

I'm a highly motivated web developer with a passion for front-end development even though I have worked as a accountant at some point in my life. It's a beautiful thing when a career and a passion come together, so I decided to shift my career path to Front End Developer. My experience includes building websites from the ground up using plain HTML, CSS, and JavaScript, as well as utilizing more advanced frameworks and technologies like React, Sass, and TypeScript to take my websites to the next level. My goal is to bring designs to life and create seamless user experiences that leave a lasting impression. I still develop my skills by taking online courses, so I am always eager to learn new technologies.
